

ALVINE MAKUTU

Full-Stack Developer | Mobile (Flutter) | Data Analysis

makutualvine@gmail.com | +254 706 074 187 | github.com/Mal-archLumi | linkedin.com/in/alvine-lumiti | awsmku.live

SUMMARY

Full-Stack Developer building production-grade web and mobile applications with React, Next.js, and the MERN stack. Experienced in Flutter mobile development, AWS/Firebase cloud integration, and Python-based data analysis. Shipped real systems and led a 10+ person engineering team.

SKILLS

Frontend:	React, Next.js, TypeScript, Tailwind CSS
Backend:	Node.js, Express, NestJS, REST APIs
Databases:	MongoDB, PostgreSQL, Firebase
Mobile:	Flutter, Dart, Android Studio
Data:	Python, Pandas, NumPy, Matplotlib, SQL, EDA pipelines
Cloud & Tools:	AWS, Firebase, Git/GitHub, Postman, Figma, VS Code

PROJECTS

AWS Student Club Website — awsmku.live (07/2025 – 04/2026)

Full-stack club platform with event management, dashboards, and role-based access.

- Built with React and Firebase/AWS; implemented role-based content delivery and dynamic admin dashboards.
- Analyzed traffic and interaction data to optimize navigation — increased student engagement by 40%.
- Managed full project lifecycle from architecture to cloud deployment.

DevKazi — Real-Time Team Collaboration App (09/2025)

Mobile application for student project teams with task management and real-time chat.

- Built with Flutter/Dart; achieved <200ms messaging latency supporting 50 concurrent users.
- Designed role-based access (leads, contributors, reviewers) with modular screen architecture.

Predictive Analytics EDA Pipeline — AI Community Africa (02/2026)

Python data analysis project on emerging African tech market datasets.

- Built EDA pipelines with Pandas and NumPy for data cleaning, transformation, and trend identification.
- Generated visualizations with Matplotlib; used AI-assisted development to accelerate delivery.

LEADERSHIP & EXPERIENCE

Projects Lead — AWS Student Club, Mount Kenya University 07/2025 – Present

- Led 10+ students designing and shipping cloud-based solutions on AWS infrastructure.
- Mentored peers on cloud architecture, deployment pipelines, and secure coding practices.
- Organized Python, SQL, and cloud workshops to build team technical depth.

EDUCATION & CERTIFICATIONS

BSc Information Communication Technology — Mount Kenya University	09/2023 – 12/2026
Certified Software Engineer (MERN Stack) — Power Learn Project Africa	02/2025 – 10/2025
DataCamp Scholarship — AI Community Africa	02/2026
